Spoken languages: English, Telugu, Hindi, French

EXPERIENCE

Association for Computing Machinery (ACM) UTD – Community Outreach — May 2026 – Present
Developer — *Richardson, TX*

- Build the website for ACM's high school hackathons and bootcamps, with event details, schedules and resources
- Forked and redesigned HARP, HackUTD's application platform, to track student hackathon applications
- Set up Jury, a hackathon judging platform, so judges can review and score student projects

Association for Computing Machinery (ACM) UTD – Projects — Spring 2026
Frontend Developer, CarCare — *Richardson, TX*

- Built a React Native + Expo mobile app with a student team that tracks car maintenance, reminders and repairs in one place
- Designed the UI in Figma and built the login/sign-up, VIN-based car profile, service upload and local repair shop screens using NativeWind
- Built the image-upload flow for service and registration stickers, with loading states, error handling and confirmation pop-ups
- Worked with backend teammates to connect screens to Firebase login, Google Calendar reminders and nearby-shop data
- Shipped the app over a 10-week program and presented it at the ACM Projects Spring 2026 Showcase

VisioNari — May 2025
Web Developer (Volunteer) — *Remote*

- Built and maintained the website for a nonprofit that runs community bootcamps teaching English and practical skills

PROJECTS

Materna – Axxess Hackathon | *HTML, CSS, JavaScript, Python* — February 2025

- Won **2nd place out of 350 participants** with a maternal healthcare web app built in 24 hours
- Led frontend development of the web app, with symptom tracking, a mood tracker, recipes and guided exercises for expecting mothers
- Built an AI chatbot in Python that gives users real-time guidance on symptoms and pregnancy questions

RealtyCheck – WeHack 2025 | *HTML, CSS, JavaScript* — March 2025

- Co-built a real estate investment web app in 24 hours: users enter a location to see nearby properties and which offer the best ROI based on recent market activity
- Built frontend features for searching by location and comparing properties by estimated return
